Power Box Rake

For Tractors or Skid Steers

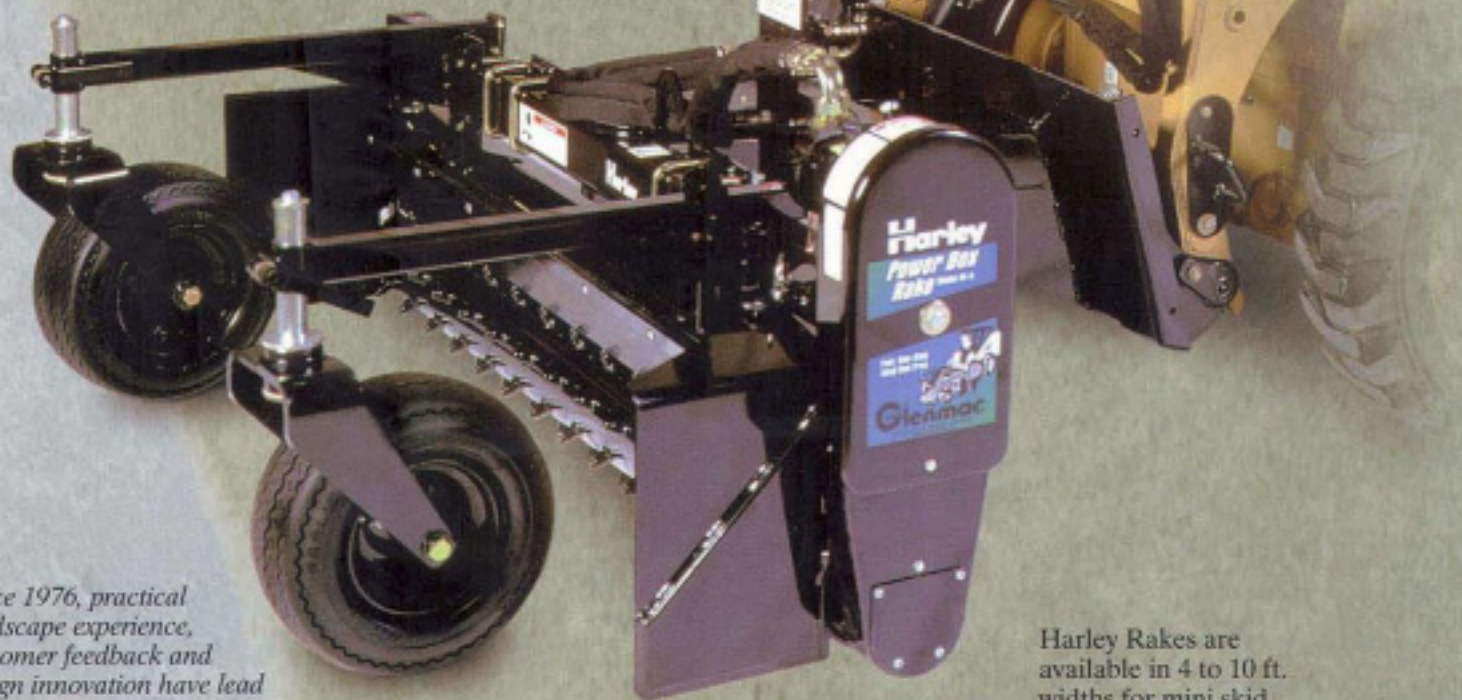

Reversible box ends Dual position end plates allow for windrowing and controlling material while operating the skid steer rake in forward or reverse. Box ends can be flared out for working along foundations or sidewalks. The box ends are reinforced with hardened steel in wear areas.

Adjustable Rhino-Hide barrier Quickly choose the size of material you want to leave in the seedbed. Raising the barrier promotes faster soil drying. The barrier is stiff for pushing yet flexible enough to allow damaging debris to pass.

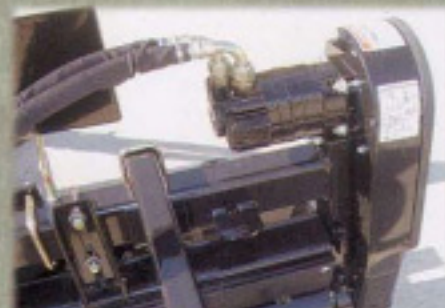

Dual independently adjustable gauge wheels allow for skim passes for over-seeding – or – adjust to cut drainage grades.

M-Series Skid Steer Rake

Since 1976, practical landscape experience, customer feedback and design innovation have lead to today's tough and reliable Harley Power Box Rakes.

Harley Rakes are available in 4 to 10 ft. widths for mini skid steer, skid steer or tractor.

Pure carbide proprietary teeth design. Carbide-tough for long life. Special blunt shape creates the best seedbed sub-base fracture pattern and superior moisture retention and release.

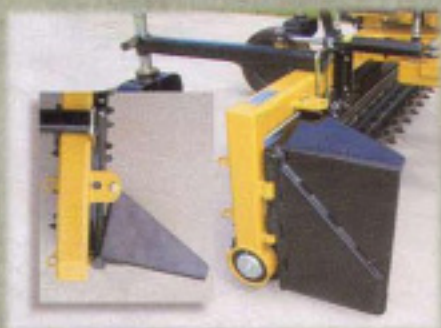

Oil bathed, enclosed chain drive with center chain idler proven to prolong drive chain life by eliminating chain slap and compensating for chain stretch. Double #50 chain on tractor and skid steer models (#60 on the Mx 8).

Single hydraulic motor located away from dirt and hazards. Harley's low profile chain case allows maximum teeth and roller depth.

Harley

Compared to the benefits of owning a Harley...
imitators barely scratch the surface.

The well-built Harley Power Box Rake is an
excellent landscaping tool match for tractor
or skid steer. Combined with these
Harley features, you'll make easy work
out of the toughest landscaping jobs.

Quick and easy removable endplates with four positions for directing material and windrowing... no bolts, just pull the pins. Carbide hard-faced and reinforced for long life.

Triple-sealed and shielded bearings for extra protection and long life.

Featuring easy-to-use Roll-Back Barrier

(Pictured above and to right)

T-Series Tractor Rake

Harley's well designed frame geometry offers **excellent visibility** of your work surface.

Harley comes complete with **all electrical and hydraulic connections included**... not as extra hidden costs.

Tractor mount compensation slot for attachment of the three point arm...fixed or floating depending on your job site requirements.

Angling capability powered by the tractor's PTO, allows the operator to angle right or left for directing material.

Tractor stand for easy hook up and convenient storage.

Mx Series Rake

Mx Series

Heavy Duty

Power Box Rakes

For Extreme Power and Dual Angling Cylinders

Cover Your Tracks with the new Mx Series Harley Rakes

The Mx Series is designed for today's more powerful skid steers, with all the features of the M Series Rake plus a heavier mainframe and attachment plate, dual angling cylinders and a more powerful hydraulic motor.

The Harley Mx Series design offers greater strength with the same non-bulky maneuverability as the 6ft. M-6 rake... easy on the job site and easy on your skid steer. The 7 ft. or 8 ft. Mx width is wide enough to cover most skid steer tracks but narrow enough for convenient transport

More powerful hydraulic motor.

Dual side-mounted angle cylinders are in line with frame for added strength and balance of power when angling.

Heavier main frame, pivot plate and attachment plate.

Mx7H
Mx8H

Choice of Mounts...Enjoy total angling operation from the seat of the skid steer! Maximum control and productivity...now with dual cylinders. Fixed and Manual mounts also available.

The Harley Rake is **four** attachments in one!

Why haul around all of those attachments?

Grade, level, rake and remove debris. Pulverize and prepare seedbed, dethatch or remove old lawns and weeds... all with one tool.

1.

Fast, One-Step Seedbed Prep

2.

3.

M-4 *Four Foot Modular Mount*

The combination of the lighter mini-skid steer and the power of a four foot Harley M-4 rake is perfect for trench restoration – the result is a dense, consistent fill with limited negative impact on existing turf.

Old, eroded, weedy seedbed.

Power raked, leveled and graded for reseeded.

Solid and even – a perfect lawn every time!

Completely remove old lawns. Easily transform wet, weedy, hard, rocky and eroded soil into the perfect seedbed with Harley tractor or skid steer rakes.

Work on wet sites sooner. Harley's adjustable Rhino Hide barrier lets you control particle size and speed the drying of wet areas. You'll get to work sooner, finish faster and move on to the next job quicker.

Forward or reverse operation allows for excellent visibility and depth control. You can rake rock forward and roll back without stopping or reversing the roller.

Blend new grades to existing lawns. Harley's milling action makes blending a snap.

Use the rake's angling ability to windrow debris. Harley's removable endplates, angling capability and 24" clearance helps you collect and direct rocks, roots, and debris into a windrows for easy pick up and removal.

The roller's blunt shaped tooth action "golfs" rock as small as 1/2" off of the seedbed during the skim pass. The resulting pebble-free dimpled subsurface promotes moisture retention and holds the seed and soil in place.

Two position winged endplates raking up close to sidewalks or foundations – reducing hand labor. Winged endplates can also be set to remain parallel to the direction of travel even when the rake is angled – avoiding unwanted plowing.

Soften, level, mix and grade even hard infield material. Ideal for recreation field conditioning, golf course maintenance or trench restoration. Harley is the perfect choice for turf removal, dethatching, topsoil conditioning and preparation of worn grass areas for re-seeding.

One Tough Rake...Tough Enough for Road Shoulder Repair!

Harley Power Box Rake "gets the job done, mile after mile. Solid carbide teeth completely remove sod clods from the roadside. Uneven or eroded shoulder is leveled while the adjustable endplate keeps material off the roadway.

Easy to operate and maintain. Just hook-up, set the depth and go.

Model 740XL

LANDSCAPING

Self-loading Mobile Screeners pick up and remove stones, roots and other debris from soil. Screen topsoil or sift sand to remove trash and seaweed. Harley Mobile Screeners produce a clean, inviting beach or recreation area.

For landscaping, use the Harley Power Box Rake to create windrows of debris for easy pick up with the Harley Mobile Screener (740 hydraulic ground dump or 740 XL hydraulic 5' high lift dump), featuring EZ-change screens that remove debris of 3/8" or larger.

vs

The Harley'd Seedbed...

See the Difference!

Why is Harley so nice? The Harley tooth roller, with proprietary blunt shaped teeth, creates a dimpled subsurface much like a golf ball's surface. This helps the seed stay in place.

The low dimples collect the seed after a rain, improving the seed pattern.

The "dimpled" sub-surface helps hold the Harley's granular surface material and seed in place, preventing erosion.

Athletic fields – the Harley Rake quickly conditions hard or weedy infields.
